Vijay Kava

Data Scientist | Python, SQL & Machine Learning

982-599-5894 | mr.vijaykava@gmail.com | linkedin.com/in/vijaykava | github.com/ervijaykava | mrvijaykava.in

Professional Summary

M.Tech student in Artificial Intelligence and Data Science with a B.Tech in Information Technology. Builds data analysis, dashboarding, and machine learning projects using Python and SQL, with hands-on experience in data cleaning, exploratory analysis, and model evaluation.

Education

Parul University — Vadodara, Gujarat
M.Tech in Artificial Intelligence and Data Science | CGPA: 8.05 — *July 2025 – Present*

Silver Oak University — Ahmedabad, Gujarat
B.Tech in Information Technology | CGPA: 8.86 — *August 2022 – May 2025*

Government Engineering College (GTU) — Jamnagar, Gujarat
Diploma in Computer Engineering | CGPA: 6.85 — *August 2019 – May 2022*

Projects

ML Studio | Machine Learning Model Training & Evaluation Platform — Live
Python, Pandas, NumPy, Scikit-learn, HTML, CSS, JavaScript

- Built a web-based platform for classification and regression with 8 machine learning models, covering CSV upload, feature/target selection, training, evaluation, prediction, and visualization.
- Tested on 50+ datasets, with approximately 90% average model performance in testing and an R-squared score of 0.94 for Random Forest Regression on one test dataset.

E-Commerce Sales & Customer Behavior Analytics — India, 2024–2025
Excel, SQL (SQLite), Python, Pandas, Matplotlib, Seaborn

- Analyzed 6,699 cleaned orders across 2,400 customers, 28 cities, and 7 categories; calculated INR 91.03 lakh in delivered revenue and 32.7% year-over-year growth (2024 to 2025).
- Applied quintile-based RFM scoring to segment 2,097 customers into 8 groups; found 304 Champions contributing 28.5% of delivered revenue.
- Produced 6 analytical charts and 3 CSV reports; found Electronics accounted for 32.6% of delivered revenue and UPI for 37.4% of orders.

Near-Real-Time US Stock Market Analytics Dashboard
Python, Power BI, Pandas, REST API, yfinance

- Built a 2-page dashboard with KPI cards and visualizations tracking 5 US stocks and 3 major indices (S&P 500, NASDAQ, Dow Jones).
- Automated data collection at 60-second intervals and integrated it with Power BI through its REST API for near-real-time updates.
- Analyzed price changes, trading volume, 52-week highs/lows, and volatility using historical and live data.

Research & Publications

Advanced Deep Learning Techniques for Rare Skin Lesion Classification — Ongoing
M.Tech Research

- Completed a PRISMA-guided synthesis of 63 studies on rare skin lesion classification under limited labeled data, covering Few-Shot Learning, Explainable AI, and Uncertainty Quantification.
- Ongoing: exploring Grad-CAM for interpretability and uncertainty estimation for prediction reliability; experimental evaluation is planned.

Transparency in Clinical Decision Support Systems via Explainable AI — PiCET 2026
International Conference — *Parul University*

Training & Certifications

Data Science Training Program – Internshala Trainings — 6 months
Training in Python, data analysis, and machine learning fundamentals.

Data Analytics Job Simulation – Deloitte Australia (Forage)
Virtual simulation applying data analysis skills to a business-style scenario.

Technical Skills

Programming Languages: Python, SQL
Machine Learning & Data Science: Machine Learning, Deep Learning, Natural Language Processing (NLP), Statistics
Libraries: NumPy, Pandas, Scikit-learn
Data Analytics & Visualization: Power BI, DAX, Microsoft Excel, Exploratory Data Analysis (EDA), Data Wrangling & Cleaning
